

ROCKEFELLER FUND MAKES \$50,000 GIFT TO FIGHT PARALYSIS

Drop of One-third in New Cases Is Reported by Brooklyn.

369 DEATHS TO DATE.

Health Board Busy With Tests of New Cure, Says Emerson.

Mayor Michael announced to-day that the Rockefeller Foundation had offered \$50,000 to be used in discovering all persons who have come in contact with infantile paralysis, and to keep them under observation so far as possible. A committee, having the Mayor as chairman, and consisting of Dr. Simon Flexner, Health Commissioner Emerson, Dr. Walter H. James and Dr. Glenworth R. Butler will commence this work at once and supervise the expenditure of the fund. Offices will be opened in the Brooklyn Department of Health Building, where Dr. Alvah H. Doty is to be in charge, working under the general supervision of the Mayor's committee.

The Board of Health to-day issued figures showing that the total number of cases reported for the week ending to-day is 977, an increase of 425 over the total for the week ending July 8, when 552 had been reported.

An predicted yesterday by the Board of Health, to-day's figures on new cases of infantile paralysis in Brooklyn, where the disease has been most prevalent, show a diminution of about one-third. More than twice as many new cases appear in the Manhattan report as were shown yesterday, an advance which is explained by the fact that more investigators are at work. A corresponding falling off is looked for when all suspected cases are checked up. To-day's figures follow:

DEATHS.	To-day.	Yesterday.
Manhattan	7	6
Brooklyn	10	6
Queens	2	1
Richmond	2	1
Total	21	14

This makes a total of 369 deaths.

NEW CASES.	To-day.	Yesterday.
Manhattan	30	10
Brooklyn	87	101
Queens	2	1
Richmond	2	1
Total	121	113

The total of all cases reported to date is 1,282.

With the exception of the one advance in deaths in Manhattan and one in Richmond, it will be noted that all the boroughs held their own against the plague or showed a falling off.

WANT INSPECTORS FUMIGATED TO AVOID DANGER.
A delegation from the Port Green section of Brooklyn, called at the Board of Health office in Manhattan this morning to ask that all inspectors engaged in looking up infantile paralysis cases be fumigated each time they come from an infected home and enter one where the existence of the disease has not yet been determined. In this way, explained the delegation there would be less danger of the investigators themselves acting as carriers of the disease.

Dr. Charles F. Holdman, head of the Bureau of Public Health Education, stated that the fears of Brooklyn residents concerning the possible carrying of infection by nurses and other investigators were quite groundless. These investigators, he explained, are all trained to take every precaution against carrying germs and they fumigate themselves whenever necessary during their daily trips.

Dr. Charles E. Banks, in charge of the office opened here by Federal Bureau of Health experts, announced to-day that efforts were being made to lift the quarantine established against New York children by contagious States. Regulation of the traffic and the issuing of passports, he said, would soon insure all neighboring territory from danger of an epidemic.

More than 300 applicants for "work and passport" were taken care of by the extra force of clerks in the Board of Health.

The continued cool weather is aiding the Board of Health in its fight against the epidemic, and members of the Board express themselves as well satisfied that it showed no spread to new districts to-day.

RECOVERIES TO INCREASE, IS BELIEF OF DR. AGER.

A reassuring comment is made by Dr. Louis C. Ager, "From what I can see," he says, "the percentage of complete recoveries is going to be much greater than was at first anticipated, and partial recoveries, in which children will not be seriously handi-

JULES VERNE'S PROPHETIC ROMANCE "Twenty Thousand Leagues Under the Sea" Begins in The Evening World Monday

The test of the German submarine liner, Deutschland, was forecast by Jules Verne in his masterpiece of fiction, "Twenty Thousand Leagues Under the Sea." You can read his vivid prophecies that have come true in The Evening World, beginning next Monday.

supported for life, will be more numerous.

Yesterday was marked by the first appearance of the disease on Central Park West and by the affliction of a woman forty-seven years old. This person, the wife of a reported architect, is Mrs. Alfonso Bonelli, of No. 1792 Atlantic Avenue, Brooklyn. She became ill shortly before noon, and an ambulance surgeon from the Bradford Street Hospital said she was suffering from infantile paralysis.

The Central Park West victim is a girl about a year old. It is said she came from Washington about three weeks ago and had been ill most of the time since her arrival. She was removed to Mount Sinai Hospital.

Difficulties which persons traveling by train and automobile are having in getting out of the city have caused many applications to be made to Health Commissioner Emerson for the examination of children and the issue of health certificates which it is expected will act as passports. The United States Public Health Service advised all persons, accompanied by children under sixteen, who contemplate a journey which calls for transit through New York City to provide themselves with certificates stating their place of departure.

NEARBY TOWNS BAR CHILDREN SOUND FOR COUNTRY.

One man, who lives in West Eighty-ninth Street, appealed to the Board of Health after he had made four attempts to get out of the city. He had planned to take his eight-year-old boy on an auto trip to the Pacific Coast. They left the city over the Forty-second Street Ferry and were turned back at Weehawken. They tried other ferries and were stopped at Edgewood and Englewood.

He then obtained a health certificate for the boy, he said, but when he attempted to go through New Rochelle he was halted.

Another cure for infantile paralysis is suggested in the Medical Journal by Dr. Beverly Robinson, who advocates the use of ammonium salicylate. Young children, he suggests, should be given from one to two grains every two hours, lessening the number of doses after twenty-four or forty-eight hours.

Much interest has been displayed in the announcement made by Dr. R. J. Meizer before the Academy of Medicine that he, using adrenalin, had successfully treated monkeys into which the virus of infantile paralysis had been injected. When Commissioner Emerson was asked for a statement of his attitude on the treatment, he dictated the following: "Suggestions for treatment having the authority of such investigators as Meizer, especially when they are based on careful clinical or experimental observations, always receive serious consideration at the hands of the Department of Health. In this case the suggestions were at once referred to the members of the Medical Board, who will doubtless be able to report on their experiences with the treatment at a later date."

THREE NEW CASES IN STATE

One Death Reported from East Hampton, Suffolk County.

ALBANY, July 15.—The State Department of Health reported three new cases of infantile paralysis to-day outside of New York City, one each in Rensselaer County, Dutchess County, and Sullivan County, making a total of 161 cases outside New York City.

One death was reported to-day at East Hampton, Suffolk County, making the total number of deaths in the State nine. In 1915, officials of the Health Department said, there were 261 cases and 47 deaths.

Student Shot by Detective in Mistake for Burglar.
CHICAGO, July 15.—T. Palmer Miller, member of the 1915 class of Dartmouth College, was shot and killed to-day by James Garvey, a detective sergeant, who mistook him for a burglar. Miller was at the house of a friend when a burglar entered the house. While members of the family and several guests were pursuing the burglar across the lawn, Sergeant Garvey arrived and fired two shots, one of which struck Miller. Miller was twenty-six years old.

PRINCE LEOPOLD REGAINS GROUND TAKEN BY RUSSIANS

More Than 1,500 Prisoners Captured Near Volhynian Sector, Says Berlin.

BERLIN, July 14 (via London).—Parts of positions in the Skrokhova region, north of the Volhynian sector, which were taken from the Germans by the Russians on July 1, have been recaptured by German troops under Prince Leopold, the War Office announced to-day. More than 1,500 prisoners were taken.

The text of to-day's army headquarters statement is as follows: "Army group of Field Marshal von Hindenburg: Russian detachments which attempted to cross the Dvina near Lennawaden, northwest of Friedland, were repulsed.

"Numerous bombs dropped on railway stations on the Memel-Moldoch line. These stations were busy at the time with a considerable traffic."

"Army Group of Prince Leopold: In the region of Skrokhova parts of positions on the first line of defense which had been held by the enemy since his first attack on the morning of July 1 were recaptured on the results of our attacks. Eleven officers and more than 1,500 men were taken prisoner."

"Army Group of Gen. von Linsingen: The situation is unchanged. Our aircraft squadrons achieved satisfactory results in their attacks on the troop transport traffic station at Kiverzy, northeast of Lutsk."

TEN-STORY LEAP AT BILTMORE KILLS MOTOR CO. OFFICIAL

(Continued from First Page.)

oughly that when he sat down with Mr. Silver this morning to discuss the plan with him for the first time he was less than one hour in getting Mr. Silver's signature to a blanket preliminary agreement.

The papers were signed in detail yesterday and soon after Mr. Smith collapsed. He complained of pains in his abdomen and was convinced he had an attack of ptomaine poisoning. He sent for physicians and a trained nurse and called his wife from her home at No. 4033 West Grand Avenue, Detroit. She arrived late last evening.

There was no evidence visible to his physicians and his wife, except from what Mr. Smith said, that Mr. Smith was not in his usual rugged health, though weary. But before he allowed Mrs. Smith to order their breakfast this morning he insisted he was growing worse and would never be well again. His imagined illness seemed to increase constantly. When his wife stepped into an adjoining room after breakfast he ran to the window and leaped out. To General Manager Skove of the Chalmers Company New York branch and other friends who were with him yesterday and who had talked with him over the telephone an hour before he killed himself the suicide of Mr. Smith seemed for a time incredible. He had told them he was very ill but gave no indication he was despondent.

STREET MISHAPS REDUCED BY MOTORCYCLE SQUAD

Ninety-Nine Fewer Vehicular Accidents in June Than in Same Period Last Year.

Acting Police Commissioner Godley made public to-day a report on the work of the Brooklyn motorcycle squad he organized last May showing that the thirty-nine men under Lieut. Howe had reduced by 99 the number of vehicular accidents in June of this year as compared with June of last year.

This year showed 338 accidents, whereas in 1915 the number was 437. The number of deaths was fourteen and 146 persons were injured. The greater number of these cases were to be charged to passenger motor vehicles.

In June of this year the squad served 97 summonses, on which there were 94 convictions and fifteen discharges with eight cases still pending. Of the convictions, 209 resulted in suspended sentences, 48 of them being for violation of the speed regulations; four persons were sent to jail and fines aggregating \$5,850 were collected.

MEYCHNIKOFF, FAMOUS BACTERIOLOGIST, DEAD

Was Noted as Exponent of Theories for the Prolongation of Life.

PARIS, July 15.—Prof. Elie Metchnikoff, the famous bacteriologist, is dead.

Prof. Metchnikoff was world-wide fame as the exponent of theories for the prolongation of human life. He was born in Russia on May 15, 1848, but had made his home in Paris for more than forty years. He was one of the world's greatest biologists.

Prof. Metchnikoff's most noted achievement was the recovery of the "sour milk cure" for preventing the progress of decay from old age. He believed the chief cause of senile decay was the so-called auto-intoxication of the body through the putrefaction of matter in the large intestine. This could be prevented, he said, by preparations of milk soured by cultures of selected lactic acid bacilli. The Nobel prize for medicine research was awarded to him in 1908.

Prof. Metchnikoff was very ill last January, but rallied and was in astonishingly good health until recently.

CONGRESSMAN MAY GOES TO COURT OF CLAIMS

Wilson Names Veteran Representative to Succeed Judge Atkinson, Who Retired.

WASHINGTON, July 15.—President Wilson stirred Washington to-day by nominating James Hay, Chairman of the House Military Committee, to the Court of Claims bench. He succeeds Associate Justice Atkinson, who recently resigned. No appointment since that of Louis D. Brandeis to the Supreme Court has caused such surprise.

Army officers were openly jubilant over the appointment, since Hay and the Army General Staff have always been at loggerheads over questions of the allocation and administration of the army. Hay has been the consistent champion of the militia.

For several months it has been reported in Congressional circles that the Administration was trying to find a place for Hay. Many of his policies have not agreed with those of the President. When the Army Bill was in the making, Hay, Secretary of War Garrison and the President became involved in a three-cornered fight over the provisions of the bill. Hay was a small army man. Garrison and the President stood for a "citizen soldiery."

Feeling between Hay and Garrison became bitter and when it appeared the President could not force a volunteer army bill through Congress because of Hay's opposition, Garrison resigned.

AUSTRIAN U-BOAT SINKS DESTROYER; AIR RAIDS ON ITALY

Successes on Land and Sea and in Air Reported by Vienna.

BERLIN, July 15 (via Wireless to Sayville).—The sinking of an Italian destroyer by an Austro-Hungarian submarine was announced in an official statement received here to-day from Vienna. The statement says: "An Austro-Hungarian submarine on the afternoon of July 10 sank an Italian destroyer of the Indomito type."

"One of our naval air squadrons bombarded effectively military establishments and the railroad station at Padua. The aeroplanes returned unharmed, although they were shelled heavily by anti-aircraft guns."

"The Indomito, laid down in 1912, was 235 feet long, displaced 450 tons, and was armed with one 4.7-inch gun, four 12 pounders and two torpedo tubes."

The repulse of heavy attacks by the Italians on the Austrian front in the Trentino, between the Brenta and the Adige, is announced in the Vienna Headquarters report of July 14. The statement says:

"Intense activity continues between the Brenta and the Adige. Strong Italian forces repeatedly attacked between Cinisello and Monte Rasta. The enemy ten times attacked northeast of Monte Rasta, being in each case repulsed by our troops, who maintained all their positions, the enemy sustaining the heaviest losses."

NEW VERDUN ATTACKS REPULSED, SAYS PARIS

Effort to Capture a Trench Northeast of Avocourt Re-doubt Falls.

PARIS, July 15.—The repulse of minor German attacks northwest and southeast of Verdun was reported by the War Office to-day, but no important actions on the Somme front were chronicled in the official communiques. On the west bank of the Meuse the French repulsed a German attack on a trench northeast of Avocourt re-doubt. On the east bank of the river violent artillery duels occurred. In the sector of Fleury the French dispersed several German reconnoissances. In Apremont Forest French contain fire checked several attempted enemy advances.

FOUR MEXICANS MUST DIE FOR KILLING U. S. TROOPER

Barrister Found Guilty of Murdering Corp. William Oberlin, Who Was Shot During Fight.

LAREDO, Tex., July 15.—Jose Antonio Arce, Jesus Maria Corda, Paulino Romero and Vincente Lora, the four alleged bandits, but self-proclaimed members of the Mexican Constitutional Army, charged with murder in connection with the killing of Corporal William Oberlin of Troop M, Fourteenth United States Cavalry, to-day were found guilty by a jury and sentenced to death.

IRISH M. P. ARRESTED; FOUND AT PRISON CAMP

Ginnell Accused of Trying to Enter Under False Pretenses—He Protests to Court.

LONDON, July 15.—Laurence Ginnell, Irish member of Parliament, who addressed many questions in the House of Commons to ministers during the Irish rebellion and invariably alleged that his countrymen, who had been arrested were mistreated, was himself arrested to-day. The charge is that he attempted by false pretenses to obtain admission to the detention barracks at Kinsford, where Irish prisoners are being held.

Mr. Ginnell was arraigned in the Bow Street Police Court and remanded until July 28. He was released under bond.

Prosecutor Bodkin said in outlining the case against Mr. Ginnell that he had been found at the detention camp when asking permission, under the name of McFingle, to see Irish prisoners. Mr. Ginnell protested to the Magistrate against his arrest, saying there was no case against him. The name McFingle, he said, was Irish for Ginnell, and the whole incident could be explained easily.

HOLD a stiff back and over they go—the playground's ringing with shouts. These are the boys that make Kellogg's Toasted Corn Flakes disappear. One good bowlful only starts the appetite for more. They want Kellogg's, the original—always crisp and full of flavor. Packed Waxtite—Look for this signature.

W.K. Kellogg

Imitations come and go! They change their name. They change their form. Some do both. Kellogg's—the Original Toasted Corn Flakes remain as original as ever—light, and dainty, appetizing in flavor with a melting crispness on the tongue.

In This Case

there are more than mere straws showing "which way, the wind blows"—

In June, 1916, THE WORLD printed a total of 112,584 lines of Summer Resort advertising.

This was 41,543 lines more than its closest competitor.

It constituted almost one-third of all the resort advertising published during that period in the seven New York morning newspapers printed in English.

The significance of these figures from the viewpoint of the advertiser—

Is that so many advertisers back their judgment of THE WORLD'S "pulling power" by spending their money for WORLD space—more of it than with any other morning newspaper—nearly one-third of the total amount spent with seven newspapers.

THE WORLD'S Circulation is in the prosperous homes of New York—

100,000 more copies of The Morning WORLD are sold in Greater New York every morning than of any other morning newspaper.

The Morning WORLD'S circulation in New York City exceeds the combined circulations of the Times, Herald and Tribune.

It is a circulation in homes of known and liberal buying capacity.
